

Labyrinth Enterprises

128 Slocum Avenue, St. Louis, MO 63119 • (800) 873-9873 • www.labyrinth-enterprises.com

Kanuga Conference Center Hendersonville, North Carolina

Medium
Polymer Concrete

Completion date
November, 2002

Technique
The labyrinth pattern was cut into the concrete using specially adapted diamond-bladed tools. The lines were then embedded with pigmented polymer concrete, which becomes a permanent part of the surface. The lines are actually stronger than the concrete itself, and should last indefinitely if properly maintained.
